

Interested in putting your LCA skills to use in
promoting sustainability?

We are WAVES – offering an IT platform that makes sustainability visible. We are a growing firm currently
developing our first IT applications.

We are looking to hire:

Senior Life Cycle Assessor

Your responsibilities will include:

- Methodical co-creation of our IT platform
- Internal project management
- Providing advice and support with customer projects

Qualifications profile:

- University degree
- Several years' experience with LCA projects
- Professional methodological competency with current ISO standards (carbon footprint, LCA, EPD)
- Expert proficiency with currently used modeling tools (GaBi, Umberto, and/or SimaPro) and databases (ecoinvent)
- Preferred: knowledgeable regarding ESG, PEF, and/or EU Circular Economy
- Good English

Other requirements:

- Strong communicator; teamwork-capable
- Able to work independently, interested in taking on new tasks and challenges
- Structured, methodical approach
- Open to ideas
- Willing to travel

As a member of our team you will have the space to develop innovations and make decisions on your own.

We offer

- an attractive work environment as part of a young and dynamic team with flat hierarchies
- an unparalleled opportunity to take on responsibility from the start while playing an active system design role
- opportunity to grow your professional expertise and skills as a member of our management team
- performance-aligned pay

Interested?

Then please send your compelling application via e-mail, stating your earliest possible start date, to:

marion.kraemer@waves.lu

We look forward to receiving your application!!

WAVES is a start-up formed in Luxembourg in 2019, active in the area of life cycle assessment. We cover the entire life cycle of our customers' products and services. Our mission is to create unprecedented transparency for businesses, consumers, and investors to enable environmental and social considerations to be incorporated into decision-making important to our future. Our solution is designed to pave the way for a circular global economy.
