

Do you want to use your skills for sustainability? We are WAVES and we use our software solutions to make sustainability visible. We are currently building our company and are looking for you as:

Computer scientist (m/f/d) for cloud-based IT solutions

Your future activities include:

- Establishment and further development of the powerful WAVES solutions
- Management of and participation in internal development projects
- Implementation of WAVES solutions in customer projects
- Consulting and support for our customers

These are your qualifications:

- Academic degree
- Very good knowledge in one programming language: Javascript/ Python/ PHP
- Good experience with GCP services (Google Cloud Platform) and SQL database queries
- Experience with project management
- Good language skills in German and English

What you bring:

- Ability to work in a team
- Courage and play instincts
- Independent way of working
- Structured approach and methodical way of thinking
- Interest in sustainability

In our team you will find room for innovative development and to make your own decisions.

We offer:

- A permanent employment contract
- A salary commensurate with performance
- Flexible working hours and the possibility to work from home
- An attractive working environment
- Professional qualification and personal development

WAVES was founded in Luxembourg in 2019 to make sustainability visible in the corporate environment. Our goal is to create unprecedented transparency for companies, consumers and investors so that environmental and social performance can be incorporated into decisions for the future.
